Create External Report form Microsoft SSRS

This article details how to create an External Report that displays data from the MS SSRS server.

PREREQUISITES:

Established connectivity to MS SSRS

1. Add New External Report

Access New > External Report > Microsoft SSRS

👚 New External Report	₽ Search		+ New	Content	🔅 Admin	👤 Yevgeniya
1 Name	Demo MS SSRS External Report					
Report Type	Microsoft SSRS	+				
Description	Demo MS SSRS External Report					
	Apply Markdown to description 2500 character max	ximum				
Dimensioned by	Not Dimensioned	+				
2 Category	My Reports and Data	+				
Put in Folder	Select Folder					
Tags						
	Start typing to find or create Tags, then press the Enter key to save.					
3 Image	Automatically Collected Manually Uploaded					
Report Image Trigger	Daily	٥	J			
4 Plugin Connection Profile	Microsoft SSRS - Demo SSRS Data Source	•				
5 Report	🔛 // ReportProducts	Edit				
6	Next: Define Details					

- 1. Provide a descriptive phrase in **Name**
- 2. Specify Category into which External Report will be placed
- 3. Define whether content has to be updated manually or automatically
 - For "Automatically Collected", specify a Report Image Trigger
- 4. Choose the MS SSRS Plugin Connection Profile
- 5. Select Report (Object) for External Report
- 6. [Next: define details]

2. Specify Report Details

Plugin Connection Profile	Microsoft SSRS - Demo SSRS Data Source	- + 🜣	
Report	/FolderRoot / SK_ReportProducts	🔅 Edit	
	There are no Filters defined. Click Manage Filters to	add a Filter. 2 T Manage Filters	
	Edit URL Test URL		
Image Collection	3 4		
Image	Automatically Collected O Manually Uploaded		
5 Report Image	 Always collect all instances of external report On Demand: only when needed for distribution 		
Report Image Trigger	Daily	- + ¢	

- 1. Show Report in defaults to "External Webpage".
 - For "Viewer", select **Show** "In iframe" or "As static image" option
 - NOTE: When opting to display the Report as a **Static Image**, make sure to **Collect Image** before going to Viewer.
- 2. Optionally, if the Report contains filters in MS SSRS, configure filtering via [Manage Filters]
- 3. *Optionally*, **[Edit URL]** to modify the URL by appending a question mark (?) followed by any filter or parameter settings
- 4. *Optionally*, **[Test URL]** to test how the Report will be displayed on External Webpage or in Viewer, depending on the display option selected in the previous step
- 5. Select **Report Image** option:
 - "Always collect all instances of external report": collect all images and cache them on a schedule
 - "On Demand: only when needed for distribution": individual images are only collected when they need to be included in an email

3. Collect Image and Publish

1	Collect Image) s to Default Si	ze							

- 1. [Collect Image]
 - NOTE: Collecting an image for a Report that includes Filters on the MS SSRS side *won't be possible* without configuring Filters and Filter Defaults in Metric Insights. Access Manage Filters to configure filtering and then proceed with image collection.
- 2. [Enable & Publish]
